## PROJECTS

### BUILT.IO BACKEND

June 2017 - September 2019

**Technology Used:** Angular.js, Node.js, Express, Gulp, Pnotify, Bootstrap, Webpack, HTML, CSS, SASS, Less, Quill, Redactor, Summernote.

**Description:** Built.io Backend and application development platform lets you build apps quickly using the tools you already know for iOS, Android and JavaScript. It powers the entire backend (servers, cloud infrastructure, database, scaling), saving you months and allowing you to focus on creating a user experience. This project in complexity was in similar tones with Firebase, although back then Firebase was not available and this was the most successful products for the company.

**My Role | Jr. Application Engineer :** It was the first project I was assigned to when I joined Built.io and I was assigned a role as a frontend developer. The language that was used was the first version of AngularJS. I helped redesign multiple Button elements, Rich Text Editors, Import/Export features & Github Extensions. This project was later discontinued and kept only on maintenance as there were multiple rivals that dominated the market later.

### OPIN - SDK FOR NBA & F1

June 2017 - Present

**Technology Used:** Typescript, Node.js, Express, ReactJS, Webpack, HTML, CSS, SASS

**Description:** OPiN (Open Partner-integration Network) SDK sits is the integration piece that is present in the nba website. It authenticates the user with different configurable login types.

**My Role | Sr. Application Engineer :** I am currently involved as an active Sr. development team member in this SDK and lead this solution that sits between OPiN and its partners.

**Link:** [www.watch.nba.com](http://www.watch.nba.com)

### COOKIE BANNER SDK FOR GDPR

May 2018 - June 2018

**Technology Used:** Vanilla Javascript, HTML5, CSS

**Description:** Cookie Banner is a simple Javascript Library which can be included in any website with complete opt-in/opt-out options for users to comply with GDPR.

**My Role | Application Engineer :** This project was an independent SDK created to suffice the need for any users to install GDPR compliance directly in their WebApp with some configuration.

### OPIN - PORTAL FOR NBA & F1

June 2017 - Present

**Technology Used:** Angular.js, React.js, Node.js, Express.js, Pnotify, Bootstrap, Webpack, HTML, CSS, SASS, Less, Quill, Google Maps

**Description:** OPiN (Open Partner-integration Network) is a partner-integration (backend) solution that simplifies the process of on-boarding new partners for NBA League Pass platform. On a broad level, the OPiN sits between the NBA and its partners.

**My Role | Sr. Application Engineer :** I am currently involved as a lead in this project. My role involves me getting requirements from the clients and Architect the solution. I have also been in the earlier stages involved as a part of the development team.

### FERNANDES FRESH FARM

June 2018 - July 2018

**Technology Used:** Vanilla Javascript, HTML, CSS, JQuery

**Description:** This website was an independent freelancing job. It involves import and export of products produced on the customers farm.

**My Role | Freelance :** This project was an independent project and I created the project to help the customer have a market with a website so that he can sell his produce to a much wider audience.
